

Buying Guide Chair Mats

Choosing a Chair mat— Easy as 1, 2, 3

1. What is your floor type?

HARD FLOOR	LOW PILE	STANDARD PILE	MEDIUM PILE	PLUSH PILE
Wood, tile, linoleum or vinyl floor	Carpets up to ¼" thick	Carpets ⅜" thick or less	Carpets ¾" thick or less	Carpets over ¾" thick

To measure carpet pile: Insert a straightened paper clip into your carpet through the padding to the top of the subfloor. Measure the distance between where the paper clip is flush with the carpet and the end of the clip.

2. What is the shape/size that fits your work area?

Lip For use under desks with smaller openings.	Rectangular/Utility For use with most desk styles.	Contoured For use with modern desk styles.
Square For use with most desk styles.	L-Workstation For use with L-configuration and corner workstations.	

For mat size consider: total floor space, width of your workstation, size of your chair base and your "roll area"—how much area you cover when you roll to retrieve items.

3. What is your usage?

If usage is 8+ hours per day or weight is 200+ lbs., choose a mat rated for plush pile carpet.

E·S·ROBBINS

A DIMENSIONS™ CHAIR MAT FOR CARPET

Beautiful crystal clear chairmat features innovative linear design for greater comfort and a smoother glide. Experience an exceptional mat engineered for all day support.
